

# PRISMARK DISCOVERY SERIES

The Discovery Series is focused on new developments, many of which are outside the scope of Prismark's other products and services. These assessments span major R&D programs, new manufacturing and business models, emerging technologies and markets, as well as the state of the electronics industry.

Over the course of the year, these reports will be distributed to all clients that subscribe to Prismark's consulting services. The intent is to provide our clients with a periodic and insightful watch of the most important new developments that will impact the opportunity for new materials, components, systems and manufacturing tools over the next five years.

Topics that will be addressed as part of the Discovery Series include a broad range of subjects such as:

- Automotive Electronics
- OLEDs
- The Electronics Industry in Vietnam
- Portable Device Teardowns
- Advanced Packaging (e.g. RCP Embedded Die)
- High Brightness LEDs
- The Impact of High Precious Metal Costs
- MEMS Manufacturing

Prismark believes that the Discovery Series will become a valuable resource as you plan the future of your business in electronics.
